Six Men Who Violated Decision of the Court by Lynching a Negro Will Appear for sentence.

(Associated Press.)
WASHINGTON, May 24.—For the first time in so serious a case the supreme court of the United States will on next Tuesday, undertake to mete out punishment for a crime of the court itself and the importance of the occasion will be enhanced by a number of defendants. The proceedings will take place in connection with the cases of Sheriff Shipp and Deputy Sheriff Gibson of Hamilton county, Tennessee, and four other residents of that county, respectively named Williams, Nolan, Padgett and May. These men were declared today guilty of an act of contempt by combining in 1905 in a conspiracy to lynch a negro named Johnson who had been sentenced to death by a local court for attacking a woman, and in whose case the supreme court had interfered to the extent of granting an appeal which had the effect of superseding the death sentence. The night following the announcement of the court's action, Johnson was taken out of the Chattanooga jail and lynched. There was no resistance on the part of the jail authorities and Shipp and a number of his deputies as well as twenty citizens were proceeded against on the charge of contempt. The six defendants were found guilty and taken into custody and will appear in the court in charge of a marshal for sentence, which may be either a fine or imprisonment or both. The case is regarded with exceptional interest because it is the first time that the highest court of the United States has ever undertaken to assert its dignity or to resent the acts of words reflecting upon it.

LUMBER SECTION OF TARIFF BILL CAUSES DEBATE

(By Associated Press.)
WASHINGTON, May 24.—No single piece of lumber was ever used more effectively as a see-saw by children than was the great lumber industry today by the United States senate. The lumber schedule of the tariff bill was under consideration almost the entire day with Senators Root, Heyburn, Doolittle and Borah contending on one hand for the protection and Senators Clapp, Burkett and McCumber arguing strenuously against the policy. The surprise of the day was the attitude of Senator Doolittle who heretofore has stood with the "progressives" throughout the fight. He took a positive demand against the radical demand for free lumber.

"GRACE IS NOT SAID OVER CHAMPAGNE"

(By Associated Press.)
DENVER, May 24.—"Grace is not usually said over champagne, and lobster a la Newberg," "Family altars are not raised over Persian rugs." "Students for the ministry do not as a rule get their early training running steam yachts." "Most of us preachers come from humble beginnings." These epigrams from Dr. Joseph W. Cochran, secretary of the Presbyterian board of education, caused considerable excitement before the general assembly of the Presbyterian church of the United States in a talk which deplored the lack of recruits for the ministry. He declared that the young men Presbyterians were being educated at "Godless state universities."

However Nothing Sensational Results From the Testimony of the Two Witnesses.

(Associated Press.)
SAN FRANCISCO, May 24.—In the Calhoun trial today Henney went into the camp of the enemy for witnesses, summoning Thomas Gibson, a detective employed by the United Railroads, and Luther Brown, who is connected with the legal department of the corporation, but never an attorney of record in the present case. Gibson proved unsatisfactory as a witness as he refused to connect himself directly with the matter of the Gallagher dynamiting investigation, although admitting that he had been instructed to look into the matter by Mullaley of the United railroads. He stated he believed that the outrage had been planned by Burns to stir up sympathy for the prosecution. Henney charged that the United Railroads were instrumental in hiding evidence of the dynamiting when Alexander King, associated with the counsel of the defense asked why, if Henney believed this that no one had been indicted. The prosecutor answered that one man was now serving a life sentence for the crime. The appearance of Luther Brown as a witness aroused the interest of the court room to a high pitch, but nothing sensational developed from his testimony today. He was still on the stand when the court adjourned. Brown declared that he had come from Los Angeles as a promoter of an electric power franchise project, and had looked into the records of the supervisors with this object in view.

(By Associated Press.)

PICKS KETCHEL TO WHIP NEGRO

(By Associated Press.)
PHILADELPHIA, May 24.—Philadelphia Jack O'Brien, who went six rounds with Jack Johnson last Wednesday night, declares that Ketchel will beat Jack Johnson if the pair ever hook up.
According to O'Brien, Ketchel is the hardest hitter in the world today. He is supremely courageous and will take any kind of a wallop to get in some of his death-dealing blows. "I do not think that Johnson can take a very severe beating, even when he is in the best condition. Even I made him back up with body blows and as soon as I did I realized that a slugger like Ketchel would be very apt to beat him."
According to O'Brien, Johnson is a very much overrated man. "He cannot hit hard, except when he is flat-footed," declared O'Brien. "He is not a quick thinker, and if he gets hit hard at close range he is likely to lose his bearing altogether. I think Johnson will be the first to go down if he starts to slug with Ketchel."

TEX RICKARD MAKES STRIKE IN PIONEER LEASE

(Special to the Bonanza.)
PIONEER, May 24.—The Rickard-Garberg lease tonight encountered the ledge it has been prospecting for and which is believed to be a continuation of the huge ore body in the Pioneer lease. The ledge was shot into by the day shift and was noticed when the night shift commenced work. The find was made in the crosscut sent out from the bottom of the 165-foot shaft, and at a point 120 feet southwest from the station.
A great excitement was caused when the strike became known and many of the residents of Pioneer visited the mine to see for themselves. Of the 50,000 shares of the stock outstanding, not a share can be secured. This new strike makes Pioneer second to none in the state as a gold producer. It will not be many days before Rickard and Garberg are shipping at least 150 tons to the smelters. There are other leasers who will be in the ore in a very short time and it is predicted inside of six weeks that Pioneer will be sending to the railroad a production of 500 tons a day.

NEW OFFICE CREATED BY THE LEGISLATURE

RENO, May 24.—The legislature at its recent session enacted a law creating a state hygienic laboratory at the University of Nevada providing the services of a bacteriologist for the diagnosis of infectious diseases for the physicians and health officers of the state and for research into the nature, cause and control of such diseases. The administration of this law was placed in the hands of the board of regents.
At their meeting on May 1 the regents took steps toward the organization of this service. Dr. W. B. Mack, professor of bacteriology at the university, was appointed director. This action provides for the state a much needed service and is in line with the prevailing practice in most states at the present time. Such laboratories are now usually maintained at public expense, where the diagnosis of such diseases as diphtheria, typhoid and tuberculosis can be made without expense to the patient.
Dr. Mack came here from Cornell university in the fall of 1906, and his work is favorably known to many of the physicians of the state for whom he has done work of this kind. He will have a competent assistant and first class service is assured. As soon as the organization can be completed a circular will be issued to the health officers, health boards and medical profession of the state announcing the service that the laboratory is ready to render.
